HTML & CSS Assignments (Day 1)

1. Create a Simple Webpage

   - Create a webpage with a heading (<h1>), a paragraph (<p>), and a link (<a>).

2. Text Styling with Tags

   - Write a paragraph with parts of the text styled in bold (<b>), italic (<i>), and underlined (<u>).

3. Organizing Content with Lists

   - Create an ordered list (<ol>) with 5 items and an unordered list (<ul>) with 3 items.

4. Form Basics

   - Create a simple form with a text input, an email input, and a submit button using <form> and <input>.

5. Understanding Inline vs Block Elements

   - Create a webpage demonstrating the difference between block (<p>, <h1>) and inline (<a>, <i>, <b>) elements. Include comments in your code explaining each.

6. Table Basics

   - Create a table with 2 rows and 3 columns, including a header row. Add text content to each cell.

7. Adding Form Labels

   - Update the form you created in question 4 by adding <label> tags for each input field.

8. Styling a Paragraph

   - Write a paragraph and apply the following styles using inline CSS: change the text color to blue, make the font size 18px, and align the text to the center.

9. Styling Lists

   - Style the ordered list you created in question 3 using inline CSS. Change the font size, list item

color, and margin.

10. Combining Elements

   - Design a webpage that includes:

     - A heading and subheading

     - A styled paragraph

     - A list (ordered or unordered)

     - A form with labeled inputs

     - A basic table.
