HTML & Bootstrap Assignments (Day 3 & 4)

Bootstrap Grid Basics

Create a responsive layout with three columns using the Bootstrap grid system. Make the columns stack vertically on small screens.

Bootstrap Tables

Design a styled table using Bootstrap classes. Include features like a striped table, a bordered table, and hover effects.

Bootstrap Cards

Create a webpage with 3 Bootstrap cards arranged in a single row. Each card should contain:

- An image

- A card title

- Some card text

- A button

Bootstrap Progress Bars

Add two progress bars to a webpage:

- One with a label showing its percentage

- Another striped and animated

Bootstrap Carousel

Create a responsive carousel with at least three slides. Each slide should have:

- An image

- A caption text

Bootstrap Modal

Add a button to your webpage that triggers a modal window. The modal should include:

- A title

- Some content text

- A close button

Bootstrap Forms and Inputs

Design a form with the following fields:

- Name

- Email

- Password

- A checkbox for terms and conditions

- A submit button styled with Bootstrap

Bootstrap Buttons

Create a webpage showcasing different types of Bootstrap buttons (btn-primary, btn-success, btn-danger, etc.) and their sizes (small, large, block button).

Text Colors and Background Colors

Create a list of items where:

- Each item has a different text color (e.g., text-primary, text-success, etc.)

- Use background color classes (e.g., bg-warning, bg-info, etc.) for every alternate item

Combining Features

Create a webpage combining these Bootstrap components:

- A navbar at the top

- A carousel below the navbar

- A grid layout with 6 Bootstrap cards arranged in 2 rows and 3 columns

- A footer at the bottom
